

COVID RISK ASSESSMENT FROM July 19th 2021 Document for Edwinstree school based on County model.

- This risk assessment template is intended to support schools in their decision-making process and enable them to assess their site and activities as required by the current government guidance.
- This assessment is based on the expectations set out in the Schools coronavirus (COVID-19) operational guidance July 2021 (applies from Step 4, after 19th July)
<https://www.gov.uk/government/publications/actions-for-schools-during-the-coronavirus-outbreak> but must be adapted in order to give a clear narrative on the specific controls being put in place within your school to manage the risk from coronavirus.

As with other areas of risk school employers and leaders are required to reduce risk as far as is reasonably practicable, recognising that it is not possible to completely eliminate the risk of coronavirus.

- During this evolving situation please monitor and follow government guidance, further reviews and updates to the template will be made following any significant updates.
- In addition you should continue to review your controls and activities and update the risk assessment to reflect any changes in practice.

Notes on completion:

- This risk assessment should be completed by the Head and SLT in consultation with staff.

Consultation with employees is a legal duty and involving staff in the planning and assessment process will aid in your controls being adopted and in easing any anxiety amongst staff.

- Where you have a Union H&S representative then make sure you consult with them as part of the risk assessment process.
- You will need to review and tailor the contents of this generic risk assessment to meet your own individual circumstances, actions determined as required but not yet in place should be moved from the 'What are you already doing?' column to the "What further action is necessary?" column. Or alternative and equivalent control measures which you have put in place added.
- Ensure this document is made **specific** to your site. Record any other **significant** findings and actions required to reduce risk further where existing controls are insufficient, assigning these actions to an appropriate manager or member of staff.
- There may also be a requirement to review other existing work activity risk assessments for your school and amend these (if you have not already done so) to include the management of the risks associated with COVID-19.

Share the risk assessment

Once the assessment is completed **share** this with all staff, make sure that you brief all temporary staff, peripatetic and supply teachers, visiting coaches etc. on your expectations on managing risk.

- You may choose to publish the risk assessment on your website to provide a clear transparent approach to the wider school community.

Monitor and review

As the school returns continue to review how staff and students adopt to your controls, there will almost certainly be areas where the risk assessment will need review to reflect additional controls or risks which only became apparent as your operational activities and curriculum are delivered.

Review and tailor the contents of this generic risk assessment to meet your school's individual circumstances, actions determined as required but not yet in place should be moved from the 'What are you already doing?' column to the "What further action is necessary?" column. Record any other **significant** findings and actions required to reduce risk further where existing controls are insufficient, assigning these actions to an appropriate manager or member of staff.
