

How can you help get your child ready for Conkers Bonkers on Friday afternoon the 21st of October House competition?

The 5 most common ways to harden a conker are:

1. Soak conkers in vinegar and bake.
2. Put conkers in oven at a low temperature and bake.
3. Cover the conker in nail varnish.

[How to get holes in your conker! No you don't have to do the drill version that goes first!](#) My favourite version is the bbq skewers!

Once you have got a hole in your conker please can you tie them with string or a shoe lace.

If it is just too much to organise – don't worry, send your child to the conker bonker area on the field next week and a year 8 Leader will help them to get holes into their conkers!
